

Interdisciplinary Team Meeting: A simulated geriatric care team meeting for discharge planning with the Cooper Family (2021)

Team Member Input on Ms. Cooper

Physician Assistant

Gives history and comments about the rehabilitation stay (this provider saw her the most)

Mrs. Cooper did well in rehab, progressing well without any complications except for one urinary tract infection (UTI) that was caught early by you and treated early during her rehab stay. She has not been delirious, but often times does get confused about the date and needs to be reminded where she is.
